What owners are saying...

"The Signature™ Series brings tunnel equipment out of the stone ages. It looks great and performs even better. The Integra™ management system gives us at Mr. Froggy's Express Wash one-button control to respond to changing weather conditions and meet customers' needs. The QuickFire® wraps are the best on the market, and the Top Wheel™ takes the fear out of owning one. The tire shiner does a great job, and it's amazing how far your chemical goes if you're not applying it to the floor anymore. Go see one in action. It will change your opinion of what a wash tunnel should be."

— Travis Saffell, Mr. Froggy's Express Wash

"Without question, our Signature™ Series tunnel helps set our wash apart. Our customers know our car wash is the nicest, brightest, and most inviting around, and they prefer coming here.

Some folks tell us, they didn't know a car wash could look so nice – which shows that owning a Signature™ Series is a real point of distinction. Simply put, the Signature™ Series has helped elevate our wash to THE wash people want to visit."

— Virny Porzio, East Main Street Car Wash

"For me, the Signature™ Series tunnel had instant appeal. I wanted it at first sight. From the unique look, to the bright finish and open feel, I knew I had found a winner.

Since installing my own, I've found that customers agree. They are drawn to the unique experience, and love the look of my wash. I get lots of compliments – and repeat business, the best compliment of all."

— Mike Dietrich, Pioneer Car Wash

Signature™ Series

Not just a clean car ...
but a fresh experience!

Anyone can equip a tunnel to produce clean cars. The savvy operator goes beyond that – to produce a memorable experience. Done right, a car wash should appeal to the senses, while reassuring customers the wash is safe for them and their vehicles.

That's why Belanger developed the Signature™ Series. With its bright powder-coated finish and eye-catching elliptical beams, the Signature™ Series looks like no other car wash on the market.

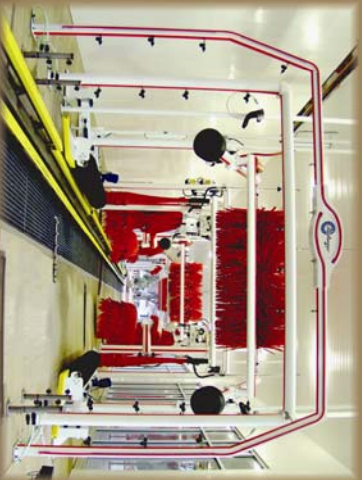

Just as customers prefer stylish cars, they'll gravitate to the sleek, curved design and rich colors of the Signature™ Series. From the moment a customer enters the wash, it's clear the Signature™ Series is something truly special.

Open, airy and inviting ... is this a car wash?

In addition to its bright colors and inviting design, the Signature™ Series offers all-electric drive for every component, including the conveyor. This eliminates hydraulic hoses from the tunnel, helping create the open, airy experience we call CleanBay™.

This pleasant experience does more than put customers at ease. It makes them want to return, again and again. For most, it's a revelation and welcome relief to learn that a car wash tunnel doesn't have to be claustrophobic.

Why the Signature™ Series sounds like a winner

All-electric drive delivers another benefit as well – it's pleasantly quiet. Customers accustomed to *clunks*, *bangs* and *knocks* in a traditional wash are often surprised by what they don't hear in a Signature™ Series tunnel. It's a moment of enlightenment for many, when they realize a car wash doesn't need to jar their hearing to clean effectively.

Using quieter equipment also enables customers to appreciate sounds they've been missing at other car washes. The sounds of actual cleaning going on – like water cascading over their vehicles. *Spritz* and *mist* sounds. And quiet sounds like the soft *whisper* of the available Whisper Wheel™ Top Wheel™, whose soft-touch Neo-Tex™ foam gently cleans and polishes the hoods, roofs and other horizontal surfaces of their vehicles.

With one-button control, you'll have time to stare

The Signature™ Series is about delivering a better experience for everyone ... including operators. That's why the Signature™ Series gives you one-button control over your entire wash line, including conveyor and equipment. With its all-electric format, variable frequency drives (VFDs) and Integra™ control system, you can respond in real time to changing business and weather conditions. Higher throughput, better wash quality and energy savings are now only a keystroke away.

Soft starts stagger equipment start-up, reducing peak electrical loads and lowering your cost of operation. When business slows down, your whole line can slow down too, prolonging equipment life and making the most of your investment.

Best of all, Integra™ can speed up your wash line, from entrance to exit, when business is good. This means you can increase throughput to meet customer demand, while still maintaining the high-quality clean customers expect from your Signature™ Series wash.
